PROFESSIONAL SUMMARY

Detail-oriented MCA graduate with a strong foundation in Java, OOP, REST APIs, Servlets, and JDBC. Experienced in Git/GitHub version control, secure web application development, blockchain-based systems, and cybersecurity through academic projects and internships. Seeking an entry-level Java Developer role.

EDUCATION

Master of Computer Applications (MCA) | Sri Venkateswara College of Engineering | 2024 – 2026 | CGPA: 8.48
Bachelor of Science (B.Sc) | Vedavyasa Degree College | 2021 – 2024 | CGPA: 7.90
Intermediate (MPC) | Vedavyasa Junior College | 2019 – 2021 | Marks: 710

TECHNICAL SKILLS

Programming Languages: Java, Python

Frameworks & Libraries: Servlets, JDBC, REST APIs

Web Technologies: HTML, CSS, JavaScript

Database: MySQL

Tools & IDEs: IntelliJ IDEA, Visual Studio Code, Git, GitHub

Core Concepts: Object-Oriented Programming (OOP), Data Structures, REST API Design, Agile Methodology

PROJECTS

Aegis Gateway – Secure Military Communication Platform

Developed during Java Developer Internship at Gradtwin Services

- Developed a Java-based secure communication web application (Aegis Gateway) designed for military gateway protection and real-time officer-level messaging, supporting multiple concurrent user roles.
- Implemented Content Security Policy (CSP/JSCSP) rules that blocked common Cross-Site Scripting (XSS) attack vectors and malware intrusion attempts across the application.
- Designed and tested a secure real-time message transmission platform across 3+ officer access levels; executed 15+ test cases validating authentication and data integrity.

Tech Stack: *Java, JavaScript, HTML, CSS, MySQL*

Blockchain-Based Supply Chain Management System for Indian Agriculture

MCA Final Year Academic Project

- Designed a decentralized supply chain platform connecting 5 stakeholder roles (seed companies, farmers, processors, distributors, retailers) using blockchain smart contracts and IPFS for tamper-proof data storage.
- Built and deployed smart contracts on Binance Smart Chain to automate stakeholder transactions, reducing reliance on intermediaries.
- Delivered end-to-end traceability from seed to consumer across all 5 modules; conducted unit, integration, and system testing to validate core transaction workflows.

Tech Stack: *Python, Binance Smart Chain (BSC), IPFS, Web3.py/Web3.js*

INTERNSHIPS

Java Developer Intern | *Gradtwin Services* 27 Jan 2026 – 28 Apr 2026

- Built the Aegis Gateway secure communication web application for military gateway protection (see Projects section for full details).

Tech Stack: *Java, JavaScript, HTML, CSS, MySQL*

Data Analytics Intern | *Internshala (Online Platform)* 17 Jul 2026 – 18 Aug 2026

- Completed a certified Data Analytics training program covering data analysis techniques and tools, applied to real-world datasets and analytics assignments.

CERTIFICATIONS & TRAINING

Data Analytics — Internshala Online Platform | Java Development Internship — Gradtwin Services
